The Pnucleus Advantage

"Before you pay a heavy price for an OK *standard* solution from a big name in the industry, contact Pnucleus Technologies and let us deliver a perfect solution at a fraction of the *standard* cost."

Searching for Mass Flow Controllers, Vacuum Controllers, and Pressure Controllers that are economical, reliable, and configurable? At Pnucleus Technologies, you can communicate your configuration requirements directly with our engineering staff right from the start. Also, if you need something more custom, direct access to an engineer profoundly reduces conceptualization & feasibility analysis and gets a prototype into your hands fast. Our intention is to win and keep your business by continually providing value as an engineering resource and manufacturer of high quality, low cost gas measurement & control devices.
